**CHEMICAL FAMILY:** Not Applicable

**PRODUCT USE:** Typical uses of heat-shrinkable polymeric products include primary electrical insulation, EMI/RFI shielding, cable jacketing and repair, strain relief, waterproofing, cable/pipe identification, corrosion protection, environmental/mechanical protection, and cable joining, splicing, and termination in telecommunications applications.

This product is not hazardous when used as recommended or intended. If this product is overheated, charred, or burned the health and safety information presented in this MSDS may apply.

Thermal decomposition and combustion byproducts may be regulated under US-OSHA; CAN-WHMIS; IOSH; ISO; UK-CHIP; or EU Directives (67/548/EEC-Dangerous Substance Labelling, 98/24/EC-Chemical Agents at Work, 99/45/EC-Preparation Labeling, 2001/58/EC-MSDS Content, and 1907/2006/EC-REACH).

**SECTION 2: HAZARDS IDENTIFICATION**

**EMERGENCY OVERVIEW:** Thermal degradation and combustion byproducts may be toxic and should not be inhaled. Thermal degradation is not significant at temperatures achieved during proper installation, as directed by product installation guides.

At temperatures higher than those recommended for proper installation, most significantly if the product burns, the thermal degradation and combustion byproducts will depend on the base polymer used, and may include, but are not limited to carbon monoxide, carbon dioxide, aldehydes (including formaldehyde), acids (including acetic acid), low molecular weight hydrocarbons, and oxides of nitrogen and sulfur.

**POTENTIAL HEALTH EFFECTS:**  
Proper installation of this product creates no known acute or chronic health hazards.

**ACUTE HEALTH HAZARDS:**

**EYES:** Contact with molten material may cause thermal burns.

**SKIN:** This product is not expected to be a skin irritant. Contact with the molten material may cause thermal burns. No harmful effects are expected from skin absorption of this product.

**INGESTION:** Ingestion of this product is highly unlikely. There is insufficient information available on this material to predict the effects from ingestion.

**INHALATION:** In common with most organic materials, thermal degradation and combustion byproducts may be toxic and should not be inhaled. (See comments below and the Thermal Degradation and Combustion Byproducts Section for more specific information.)

**CHRONIC HEALTH HAZARDS:**

None of the ingredients to which users may be exposed and which are present at equal to or greater than 0.1% of the product, are listed by OSHA, NTP, or IARC as suspect carcinogens.

**MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE:**

Overheating the product to charring or burning may produce vapors that may cause eye, skin, nose and throat irritation. Persons with pre-existing eye, skin, or respiratory disorders (e.g., asthma conditions) may be more susceptible to the effects of these vapors.

### SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

**INGREDIENTS (Chemical/Common Names):**                      **CAS No.:**                      **% by Wt:**                      **EC No.:**

Not applicable – This product is a manufactured article.

Base polymer materials include polyethylene, olefin copolymers and polyamides. Heat-shrinkable products may be coated with or used in conjunction with adhesives/mastics, which are based on olefin copolymers or polyamides. Larger products may be coated on their exterior with an acrylic-based temperature-sensitive paint, which indicates to the installer when sufficient heat has been applied to cause the adhesive to flow.

### SECTION 4: FIRST AID MEASURES

- EYE CONTACT:** If eye irritation occurs, hold eyelids apart and flush affected area(s) with clean water. Seek medical attention.
- SKIN CONTACT:** First Aid is normally not required. After handling product, it is good work practice to wash your hands. If molten material contacts skin, cool area immediately in water. DO NOT attempt to remove material from the skin. Treat as a burn, and seek medical attention.
- INGESTION:** Not a normal route of exposure. However, if swallowed and symptoms develop seek medical attention.
- INHALATION:** If respiratory symptoms or other symptoms of exposure develop, move victim to fresh air. If symptoms persist, seek medical attention. If breathing difficulties develop, qualified personnel should administer oxygen. Seek immediate medical attention. If victim is not breathing, immediately begin artificial respiration. Keep victim warm and quiet; seek immediate medical attention.

### SECTION 5: FIRE-FIGHTING MEASURES

#### FLAMMABLE PROPERTIES

**METHOD USED:** Not applicable

#### FLAMMABLE LIMITS

**UPPER FLAMMABILITY LIMIT (% BY VOLUME):** Not applicable  
**LOWER FLAMMABILITY LIMIT (% BY VOLUME):** Not applicable

**AUTOIGNITION TEMPERATURE:** Not applicable

#### SUITABLE EXTINGUISHING MEDIA:

Use carbon dioxide, water, dry chemical, foam or dry powder.

Selection of extinguishing media should be based upon the size of the fire, the firefighting training/experience of the individual attempting to extinguish or control the fire, and the packaging materials exposed to the fire.

#### SPECIAL FIRE FIGHTING PROCEDURES & PROTECTIVE EQUIPMENT:

Firefighters should wear self-contained breathing apparatus with a full-face piece operated in the positive pressure demand mode when fighting fires. Use water spray to keep fire-exposed containers cool.

#### UNUSUAL FIRE AND EXPLOSION HAZARDS:

Toxic fumes may be given off in a fire. See also sections on Thermal Degradation and Combustion Byproducts and Other Precautions.

#### SPECIFIC HAZARDS IN CASE OF FIRE:

Contact with the molten material may cause thermal burns.

#### HAZARDOUS COMBUSTION PRODUCTS:

In common with most organic materials, thermal degradation and combustion byproducts may be toxic and should not be inhaled. Thermal degradation is not significant at temperatures achieved during proper installation, as directed by product installation guides. At temperatures higher than those recommended for proper installation, most significantly if the product burns, the thermal degradation and combustion byproducts will depend on the base polymer used, and may include, but are not limited to carbon monoxide, carbon dioxide, aldehydes (including formaldehyde), acetic acid, low molecular weight hydrocarbons, and oxides of nitrogen and sulfur.

**SECTION 6: ACCIDENTAL RELEASE MEASURES**
**PERSONAL PRECAUTIONS:**

Wear appropriate personal protection when responding, as specified under Section 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

**ENVIRONMENTAL PRECATIONS:**

Prevent spilled material from entering sewers and waterways.

**SPILL CONTAINMENT & CLEANUP METHODS/MATERIALS:**

Sweep up and collect in a suitable container for disposal or reuse.

**SECTION 7: HANDLING AND STORAGE**
**PRECAUTIONS FOR SAFE HANDLING AND STORAGE:**

**Handling:** Avoid any vapors given off if the product is heated to decomposition, as shown by a darkening and browning of the sleeve. Avoid contact with molten material. Heat-resistant gloves are required if hot products are handled after installation. Do not consume food, beverages or tobacco in the immediate work area. Wash hands before eating, drinking or smoking.

**Other Precautions:** Avoid heating products beyond temperatures required for normal installation. See installation instructions for proper installation procedures. If product chars or burns, immediately stop heating. Avoid inhaling any fumes, which may be given off under such circumstances. Allow any vapors to disperse and ventilate before continuing work in the area.

**Storage:** This product is stable under normal conditions.

**OTHER PRECAUTIONS (e.g.; Incompatibilities):**

None

**SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**
**ENGINEERING CONTROLS/SYSTEM DESIGN INFORMATION:**

Ensure adequate ventilation during installation.

**VENTILATION:**

Provide general or local exhaust ventilation systems

**RESPIRATORY PROTECTION:**

If installation occurs in a confined, unventilated area, NIOSH/MSHA-approved respirators are recommended.

**EYE PROTECTION:**

Use safety glasses with side shield or goggles to prevent contact with eyes, as appropriate to the given operation.

**SKIN PROTECTION:**

Avoid contact with skin. Use heat resistant rated gloves to prevent skin contact, as appropriate to the given operation. If it is necessary to handle grossly overheated or fire-damaged products, wear natural rubber gloves to prevent possible contact with potentially corrosive inorganic acid residues.
